

SEMI-AUTO BOV

UP TO 15 CPM

SEMI-AUTOMATIC BAG-ON-VALVE

Designed for R&D labs and low-volume production, this fully pneumatic system combines safety, efficiency, and portability in a compact footprint. Multiple machines can be placed side-by-side or easily repositioned, while cans are manually loaded under the stations. Operation requires pressing two ergonomic palm buttons simultaneously to activate the crimper and filler heads, ensuring controlled performance with enhanced operator safety and comfort.

SEMI-AUTO BOV UTC CRIMPER FRAME MOUNT

- Height adjustable station mounting post
- Under the cup time gassing station
 - Compressed air or inert gas
- 3-Stage air cylinder assembly
- 1 Inch internal crimping head
- 8-Segment internal crimp collet
- Five (5) common size can sealing rings
- Precision regulator and gauge for pressure around bag
- 0-3 second timer for time gassing
- Crimp height, crimp depth and diameter adjustments
- All pneumatic operation
- PLC upgrade available
- Footprint size 35"L x 35"W x 77"H
